

Constant innovation and customized solutions for broadband broadcasting utilizing coax cables, fibre optic and satellite, that's what DCT DELTA AG, headquartered in Bodman-Ludwigshafen, stands for.

We make high-quality television reception and high-speed internet connection possible for millions of households for over 30 years now.

Our production site is located at Bodman Headquarter on Lake Constance enabling us to respond quickly and flexibly to customer requests.

Join us as

Electronics Designer (m/w/d) – Communications Engineering

at our R&D office in Gdansk (Poland)

The Job:

- Product development of integrated circuits and broadband amplifiers, optical fibre nodes as well as Head-End-Equipment in the CATV/FTTx segment or other emerging technologies for fast data transfer (DSP, FPGA)
- Design, layout, prototype
- Developing concepts, requirement specifications, production documents and product documentation
- Testing and qualification
- Introduction of pilot batches and subsequently production support

The Developer We Are Looking For:

- You have a degree in Electrical Engineering with emphasis on Telecommunications or a strong track record of successfully completed projects
- You can work confidently with PCB-CAD tools preferably Altium Designer.
- You have substantiated knowledge in the area of circuit development up to 2 GHz
- If you have practical experience it is a bonus
- You are reliable, fix problems once you see them and bring technical creativity to the table,
- Teamwork, intercultural and communication skills as well as subject-specific English are part of your competences

Why Should You Join:

- A crucial role in a young, dynamic and international Team
- An onboarding buddy to integrate you smoothly into our team
- A mentor helping you with your personal goals, technical progress in general and your engineering skills in particular
- Competitive salary and flexible working hours

We focus on creating a diverse and inclusive culture, encouraging individual expression in the workplace and thrive on the innovative ideas this generates. If this sounds like the workplace for you, apply now!
